

THE INTUITIVE DIGITAL INSPECTION AND WORKFLOW TOOL

"With the Hunter and Kukui integration, my average ticket price went through the ceiling. In the first month we had an increase of over 34%"

Alan Beech - Owner, Beech Motorworks

CREATING TRUST AT THE POINT OF DECISION

AutoServe1 delivers a simple and easy to use platform for vehicle inspections and in-shop workflow management with a common user interface across all PC and mobile devices. AutoServe1 also creates an environment which allows customers to educate themselves about recommended services and then to engage the service writer in a conversation about those recommendations. **This develops trust between the customer and the shop.**

The logo for Auto Serve 1, featuring three orange slanted bars to the left of the text "Auto Serve 1" in a bold, sans-serif font. The number "1" is enclosed in a square box.

HIGHLIGHTS OF AUTOSERVE1

Digital Vehicle Inspections From Any Device

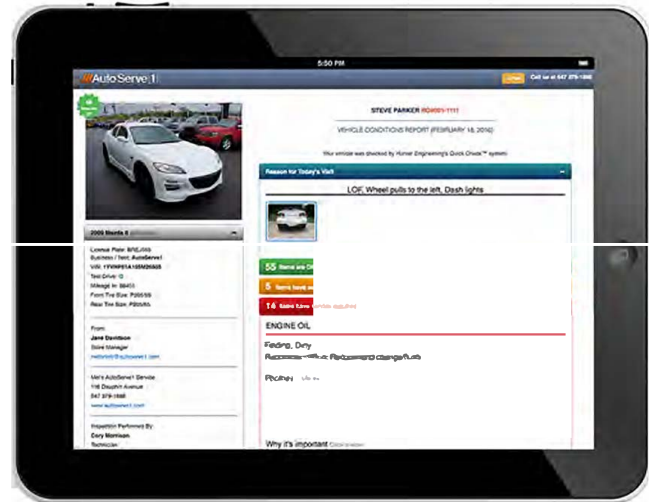

Pictures, Videos, and Voice to Text notes

One hour of training for immediate shop productivity

Detailed Shop Analytics Reporting

Two-Way Online Meetings with Customers

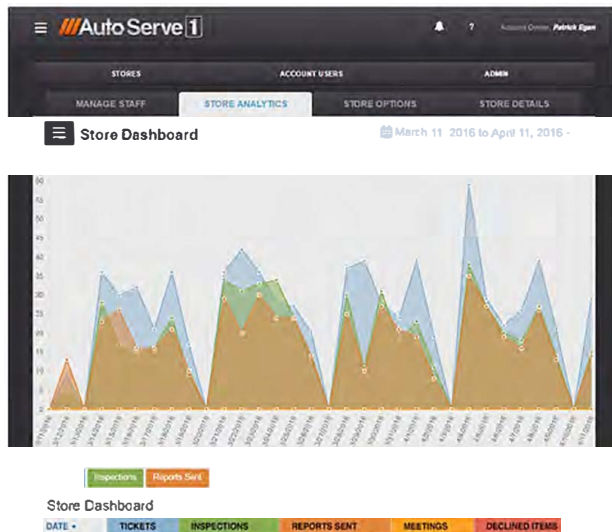

Customizable Inspections

INSPECTIONS WITH PHOTOS AND VIDEO SELL MORE JOBS

Technicians perform a full vehicle inspection using a tablet or phone instead of paper while recording the process with pictures, videos and voice to text notes. Service Advisors then send the results immediately to customers on their smart phones.

Digital inspections with photos and videos create trust with your customers. Service Advisors have an easier time selling work when customers can see what technicians see. Repair shops using AutoServe1 have seen an increase in their average repair order of 15% or more. This can mean as much as \$10,000 per month or more.

ANALYTICS DASHBOARD

Key first steps to increased profits in the shop are to; establish a regular process of inspecting every vehicle, and then, being able to monitor the progress of that process. AutoServe1's Analytics Dashboard lets the shop owner monitor key metrics like how many tickets were created each day. How many of those were inspected. And how many of those inspected had a report sent to a customer. Associating these metrics with trends in Average Repair Order enables the shop owner stay on top of team member performance.
